

COVID-19 Community-Based Testing & Vaccination Billing Guide

Policy

This policy is retroactive to March 1, 2020 (New Uninsured Aid Category – “COVID-19 Temporary,” only retroactive back to March 18, 2020). This billing guide will be updated as new information becomes available.

This billing guide was created to assist providers to understand what COVID-19 services are covered by Nevada Medicaid (including Nevada Check Up) for only mass community-based testing and vaccination events such as what is conducted via a public health preparedness Point of Dispensing (POD) event with a high throughput of patients. At these mass community-based testing and vaccination events, Nevada Medicaid covers:

- COVID-19 assessments,
- COVID-19 diagnostic and serology antibody testing, and
- COVID-19 vaccines.

Community-based testing and vaccination is currently being conducted via drive-thru methods. However, community-based testing and vaccination can be conducted through clinics or other methods that are deemed appropriate within a community for the sole purpose of mass testing and vaccinating only with a high throughput of patients.

All medical providers, clinics, outpatient hospitals, laboratories, and other providers conducting community-based testing and vaccination events must be enrolled into Nevada Medicaid in order to seek reimbursement. [Web Announcement #2389](#) gives details on urgent enrollment for providers that are not currently enrolled in Nevada Medicaid and wish to do so for the COVID-19 vaccine administration fee.

The Centers for Medicare and Medicaid Services (CMS) has removed the physician-order requirement during the COVID-19 public health emergency. This allowance is permissible only if it is intended to avoid COVID-19 transmission. CMS explains that these changes will permit States to cover:

- COVID-19 tests not ordered by a physician,
- COVID-19 tests administered in certain “non-office settings” intended to maximize physical distancing, like “parking lots” or “other temporary outdoor locations,” and
- Laboratories processing of COVID-19 tests that the Food and Drug Administration (FDA) has authorized for home use, where patients self-collect in alternative locations (such as at home).

Nevada Medicaid policies are published in the Medicaid Services Manual (MSM) which is located on the Division of Health Care Financing and Policy website at <http://dhcfp.nv.gov> (select “Manuals” from the “Resources” webpage). Chapters related to community-based testing and vaccinations include:

- MSM 100 – Medicaid Program
- MSM 600 – Physician Services
- MSM 800 – Laboratory Services
- MSM 1200 – Prescribed Drugs.

Please see the [COVID-19 General Billing Guide](#) for specific instructions on general COVID-19 billing guidance. All billing guides can be found at: <https://www.medicaid.nv.gov/providers/BillingInfo.aspx>.

Please continue to watch for new COVID-19 Web Announcements at: <https://www.medicaid.nv.gov>. These Web Announcements can be sorted by category including COVID-19.

All CMS blanket waivers can be found at: <https://www.cms.gov/files/document/summary-covid-19-emergency-declaration-waivers.pdf>.

COVID-19 Community-Based Testing & Vaccination Billing Guide

All Nevada approved CMS waivers can be found at: <http://dhcfnv.gov/covid19/> or at <https://www.medicaid.gov/resources-for-states/disaster-response-toolkit/coronavirus-disease-2019-covid-19/index.html>.

Fee Schedule

Fee-for-Service (FFS) rates are available on the Provider Web Portal at <https://www.medicaid.nv.gov> through the "Search Fee Schedule" function, which is listed under "Featured Links" on the left side of the webpage.

Please contact the Managed Care Organizations (MCOs) for their fee schedules. The MCOs include:

- Anthem Blue Cross Blue Shield Healthcare Solutions
 - <https://mediproviders.anthem.com/nv/Pages/home.aspx>
 - (844) 396-2330
- Health Plan of Nevada
 - www.myhpnmedicaid.com/Provider
 - (800) 745-7065
- SilverSummit Healthplan
 - www.silversummithealthplan.com/providers.html
 - (844) 366-2880

Specific COVID-19 reimbursement rates will also be published in Web Announcements.

Medicaid Eligibility

Reimbursement from Nevada Medicaid is contingent on recipient eligibility. Nevada Medicaid recipients are issued a plastic insurance card upon approval for benefits. The card is issued with their full eleven-digit billing number, last name, first name, sex, and date of birth. The card does not identify the category of eligibility, nor does it carry photographic or other individual identifying information, and it does not guarantee eligibility for benefits. Newly approved Medicaid recipients may present a Notice of Decision from the Division of Welfare and Supportive Services as proof of eligibility. Therefore, recipients may come to a community-based testing event with their insurance card, without their insurance card, or with a letter indicating their eligibility.

Medicaid eligibility is determined on a month-to-month basis. Providers must always verify recipient eligibility prior to providing services, as well as the identification of the individual through a driver's license, Social Security card, or photo identification. Before services are rendered, providers must check the individual's eligibility via the Nevada Medicaid Electronic Verification System (EVS), by phone using the Automated Response System (ARS), or by using a swipe card vendor. If the individual does not have their Medicaid insurance card physically present, the provider can still look up eligibility with proper identification. The EVS secure Provider Web Portal and user manual can be found at: <https://www.medicaid.nv.gov>.

Services for COVID-19 are covered under the following eligibility groups:

- FFS – Medicaid Fee-For-Service
- MCO – Managed Care Organization
- FFS / QMB – Medicaid Fee-For-Service and Qualified Medicare Beneficiary
- New Uninsured Aid Category named "COVID-19 Temporary"

Web Announcements will be posted if any new COVID-19 eligibility categories are approved by CMS. Nevada Medicaid Web Announcements are posted at <https://www.medicaid.nv.gov>.

COVID-19 Community-Based Testing & Vaccination Billing Guide

NEW UNINSURED AID CATEGORY – “COVID-19 TEMPORARY”

This aid category is only available from March 18, 2020 to the end of the public health emergency. In order to be eligible, the individual must meet the definition of “uninsured individual” and are not covered by another health plan such as a federal health care program (including Nevada Check Up, Medicare, TRICARE, VA, federal employee health plan), group health plan or health insurance coverage offered by a health insurance issuer including a qualified health plan through an Exchange, employer-sponsored health insurance, retiree health plans, or COBRA continuation coverage.

A person who is eligible for this New Uninsured Aid Category may not already be enrolled in Nevada Medicaid. Services can be provided to an individual, but the individual will need to be referred to the Nevada DWSS to screen for eligibility and complete their enrollment. The provider takes on the risk of no reimbursement if they provide services to a person who is not enrolled in Nevada Medicaid.

In order to submit claims for which eligibility was determined after the date of service within the required time frame, providers should query the EVS every 30 days until the determination of eligibility is obtained.

EMERGENCY MEDICAID ONLY (EMO)

Non-citizens are not eligible for COVID-19 services through Nevada Medicaid at community-based testing or vaccination events.

HRSA COVID-19 UNINSURED PROGRAM

The Health Resources and Services Administration (HRSA) will provide claims reimbursement to health care providers generally at Medicare rates for testing, vaccinating, and treating uninsured individuals. For more information on this program, please visit <https://www.hrsa.gov/coviduninsuredclaim>.

Prior Authorization & Limitations

PRIOR AUTHORIZATION

Nevada Medicaid (FFS and MCO) does not require prior authorization for COVID-19 evaluation and management (E/M) services (assessments), diagnostic testing, serology antibody testing, or COVID-19 vaccines.

LIMITATIONS

The following are the service limitations from each of the MCOs for COVID-19 diagnostic testing and serology antibody testing:

- Anthem Blue Cross Blue Shield Healthcare Solutions
 - No limitations
- Health Plan of Nevada
 - No limitations
- SilverSummit Healthplan
 - Limited to one test per day (one total per day, not one of each per day)

Payment is contingent upon eligibility, available benefits, contractual terms, limitations, exclusions, coordination of benefits, and other terms and conditions set forth by the benefit program.

COVID-19 Community-Based Testing & Vaccination Billing Guide

Covered Services

FFS, MCO, FFS/QMB

Nevada Medicaid covers COVID-19 E/M assessments, diagnostic and serology testing, and vaccination administration at community-based testing and vaccination events. For Medicaid recipients that have both Medicaid and Medicare coverage, the COVID-19 vaccine administration fee will only be covered through Medicare and cannot be billed to Nevada Medicaid.

NEW UNINSURED AID CATEGORY – “COVID-19 TEMPORARY”

Services are limited to:

- E/M assessments,
- Diagnostic and serology antibody testing, and
- Chest X-ray services.
- This does not include any coverage for COVID-19 treatment or COVID-19 vaccine administration.

Billing Information

Below are the covered ICD-10, E/M, laboratory, and vaccination codes along with appropriate provider types (PTs) that would be used for a community-based testing or vaccination event.

The following PTs can conduct COVID-19 E/M assessments, diagnostic and serology antibody testing, and vaccinations through mass community-based events:

- PT 12 – Hospital, Outpatient
- PT 17 Specialty 174 – Public Health Clinic
- PT 17 Specialty 195 – Community Health Clinic, Nevada Division of Public and Behavioral Health
- PT 20 – Physician, M.D. / Osteopath, D.O.
- PT 24 – Advanced Practice Registered Nurse
- PT 77 – Physician's Assistant

Other PTs may include:

- PT 17 Specialty 180 – Rural Health Clinic
- PT 17 Specialty 181 – Federally Qualified Health Center
- PT 47 – Indian Health Service and Tribal Clinic

ICD-10 CODES

The following ICD-10 codes are directly related to COVID-19.

Diagnosis Codes	Description
U07.1	Virus identified is assigned to a disease diagnosis of COVID-19 confirmed by laboratory testing
Z71.1	Person with feared health complaint in whom no diagnosis is made

The following are ICD-10 diagnosis codes that may be helpful for reporting encounters related to possible COVID-19 exposure. Additional coding guidance can be found in the ICD-10-CM coding guidance at:

<https://www.cdc.gov/nchs/data/icd/COVID-19-guidelines-final.pdf> and

<https://www.cdc.gov/nchs/data/icd/ICD-10-CM-Official-Coding-Guidance-Interim-Advice-coronavirus-feb-20-2020.pdf>.

COVID-19 Community-Based Testing & Vaccination Billing Guide

Diagnosis Codes	Description
Z03.818	Encounter for observation for suspected exposure to other biological agents ruled out
Z20.828	Contact with and (suspected) exposure to other viral communicable diseases
Z11.59	Encounter for screening for other viral diseases

EVALUATION / MANAGEMENT (E/M)

The provider conducting the assessment, collecting the specimen for the COVID-19 diagnostic or serology antibody test, conducting a point of care “rapid test”, or administering a COVID-19 vaccine can bill Nevada Medicaid for an E/M visit. Services conducted must be within the providers scope of practice. Providers must still follow Current Procedural Terminology (CPT) guidelines on appropriate E/M codes to bill.

If only a COVID-19 test or vaccine is being conducted, the lowest E/M CPT code would be the most appropriate; example – Per CMS, 99211 will be excepted for all patients and not just established ones.

CPT Codes	Description
99201	Office / Outpatient Visit New Patient – 10 minutes
99202	Office / Outpatient Visit New Patient – 20 minutes
99203	Office / Outpatient Visit New Patient – 30 minutes
99204	Office / Outpatient Visit New Patient – 45 minutes
99205	Office / Outpatient Visit New Patient – 60 minutes
99211	Office / Outpatient Visit Established Patient – 5 minutes
99212	Office / Outpatient Visit Established Patient – 10 minutes
99213	Office / Outpatient Visit Established Patient – 15 minutes
99214	Office / Outpatient Visit Established Patient – 25 minutes
99215	Office / Outpatient Visit Established Patient – 40 minutes

Encounter-based PTs such as the following can also conduct E/M assessments:

- PT 17 Specialty 180 – Rural Health Clinic
- PT 17 Specialty 181 – Federally Qualified Health Center
- PT 47 – Indian Health Service and Tribal Clinic

These PTs would use an Encounter Code and not an E/M code:

- G0466 – New Patient Medical Visit
- G0467 – Established Patient Medical Visit
- T1015 – Clinic Visit / Encounter

TESTING

For COVID-19 diagnostic testing, Medicaid recipients can be tested if they are symptomatic or asymptomatic, in accordance with the technical bulletin from the Nevada Division of Public and Behavioral Health (DPBH), State Medical Officer and under recent guidance released by the CMS. Technical bulletins from the DPBH can be found at: http://dpbh.nv.gov/Resources/Technical_Bulletins-New/.

The COVID-19 diagnostic and serology antibody laboratory testing codes are available for the following enrolled PTs:

- PT 12 – Hospital, Outpatient
- PT 43 – Laboratory

COVID-19 Community-Based Testing & Vaccination Billing Guide

The following PTs can also conduct a COVID-19 point of care “rapid test” with an appropriate CLIA Waiver. These providers may also collect the specimen and send to a PT 43 Laboratory for analysis instead.

- PT 12 – Hospital, Outpatient
- PT 17 Specialty 174 – Public Health Clinic
- PT 17 Specialty 180 – Rural Health Clinic
- PT 17 Specialty 181 – Federally Qualified Health Center
- PT 17 Specialty 195 – Community Health Clinic, State Health Division
- PT 20 – Physician, M.D. / Osteopath, D.O.
- PT 24 – Advanced Practice Registered Nurse
- PT 47 – Indian Health Service and Tribal Clinic
- PT 77 – Physician’s Assistant

Please Note – Any point of care “rapid test” for COVID-19 that is conducted by a PT that is reimbursed an encounter-based rate will not be reimbursed separately outside of their current rate. All providers must follow current policy outlined in their MSM for laboratory services.

Pharmacies

Pharmacies are providing COVID-19 rapid tests. However, Nevada Medicaid is currently not able to reimburse pharmacies for these testing services. Therefore, if a recipient desires to utilize a pharmacy for a COVID-19 test, the recipient may be asked to pay cash for these testing services. It is best to refer a recipient to a provider that can bill Nevada Medicaid for this service.

COVID-19 Diagnostic Testing

CPT/HCPCS Codes	Description	Retroactive Date
U0001	CDC 2019 novel coronavirus (2019-ncov) real-time rt-pcr diagnostic panel	3/1/2020
U0002*	2019-ncov coronavirus, sars-cov-2/2019-ncov (covid-19), any technique, multiple types or subtypes (includes all targets), non-CDC	3/1/2020
U0003	Infectious agent detection by nucleic acid (DNA or RNA); severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) (Coronavirus disease [COVID-19]), amplified probe technique, making use of high throughput technologies as described by CMS-2020-01-R	3/1/2020
U0004	2019-nCoV Coronavirus, SARS-CoV-2/2019-nCoV (COVID-19), any technique, multiple types or subtypes (includes all targets), non-CDC, making use of high throughput technologies as described by CMS-2020-01-R	3/1/2020
87426*	Infectious agent antigen detection by immunoassay technique, (e.g., enzyme immunoassay [EIA], enzyme-linked immunosorbent assay [ELISA], immunochemiluminometric assay [IMCA]) qualitative or semiquantitative, multiple-step method; severe acute respiratory syndrome coronavirus (e.g., SARS-CoV, SARS-CoV-2 [COVID-19]) Note: Code 87426 is a child code under 87301. Therefore, do not bill 87426 with 87301.	6/25/2020
87635*	Infectious agent detection by nucleic acid (DNA or RNA); severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) (Coronavirus disease [COVID-19]), amplified probe technique	3/1/2020
87636	Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) (Coronavirus disease [COVID-19]) and influenza virus types A and B, multiplex amplified probe technique	10/6/2020

COVID-19 Community-Based Testing & Vaccination Billing Guide

87637	Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) (Coronavirus disease [COVID-19]), influenza virus types A and B, and respiratory syncytial virus, multiplex amplified probe technique	10/6/2020
87811*	Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) (Coronavirus disease [COVID-19])	10/6/2020
87428	Infectious agent antigen detection by immunoassay technique, severe acute respiratory syndrome coronavirus and influenza virus types A and B	11/10/2020

* Point of Care "Rapid Tests"

COVID-19 Serology Antibody Testing

CPT Codes	Description	Retroactive Date
86328*	Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) (Coronavirus disease [COVID-19]) – Antibody testing using single step method	3/1/2020
86413	Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) (Coronavirus disease [COVID-19]) antibody, quantitative	9/8/2020
86769	Antibody; severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) (Coronavirus disease [COVID-19]) – Multi-step method	3/1/2020

* Point of Care "Rapid Tests"

COVID-19 VACCINES

The FDA authorized several COVID-19 vaccines for Emergency Use Authorization (EUA) and now FDA approval. A list of these COVID-19 vaccines can be found at <https://www.cms.gov/medicare/medicare-part-b-drug-average-sales-price/covid-19-vaccines-and-monoclonal-antibodies>. The COVID-19 vaccine is covered by Nevada Medicaid as a preventative services benefit. The COVID-19 vaccine will be provided at no-cost to providers by the federal government. Providers may not bill Nevada Medicaid for the vaccine itself but may bill for the vaccine administration fee only. Providers may not charge Nevada Medicaid recipients for the vaccine or the vaccine administration fee as this is a covered service.

The COVID-19 vaccine will not be distributed through the Vaccines for Children Program and instead will only be distributed through the current federal distribution process.

Nevada Medicaid will only reimburse providers for the vaccine administration fee for the ages that have been authorized by the FDA. Claims submitted on recipients below these licensed ages will be denied.

Do not use vaccine administration CPT codes 90460, 90461, 90471, 90472, 90473 or 90474 for the administration of any COVID-19 vaccine. Use the codes outlined in the table below as they were developed specifically for COVID-19. If providers have administered a COVID-19 vaccine to a Nevada Medicaid recipient, please submit the claim to prevent denials for timeliness.

For Medicaid recipients that have both Medicaid and Medicare coverage, the COVID-19 vaccine administration fee will only be covered through Medicare and cannot be billed to Nevada Medicaid.

All Nevada Revised Statutes (NRS), Nevada Administrative Code (NAC), Nevada Emergency Directive 011, and Nevada Medicaid policies apply on which providers can vaccinate and be reimbursed for the COVID-19 vaccine administration fee. The following PTs will be able to bill Nevada Medicaid for the COVID-19 vaccine administration fee at community-based mass vaccinating events.

- PT 12 – Hospital, Outpatient
- PT 17 Specialty 174 – Public Health Clinic
- PT 17 Specialty 195 – Community Health Clinic, State Health Division
- PT 20 – Physician, M.D. / Osteopath, D.O.
- PT 24 – Advanced Practice Registered Nurse

COVID-19 Community-Based Testing & Vaccination Billing Guide

- PT 28 – Pharmacy
- PT 77 – Physician's Assistant

All encounter-based providers must bill using their encounter code and the COVID-19 vaccine administration codes. The claim will pay according to the established encounter rate and the vaccine administration code will pay at \$0 as the service is included in the encounter reimbursement. This will allow the DHCFP to track the COVID-19 vaccines administered for federal reporting purposes.

On 3/25/2021, the DHCFP was approved by CMS to reimburse allowable providers listed above at 100% of the Nevada geographically-adjusted rate for the COVID-19 vaccine administration fee. These rates will be posted in a Web Announcement located at <https://www.medicaid.nv.gov/providers/newsannounce/default.aspx>.

Medical providers must bill each vaccine administered with the following:

- Vaccine CPT code with National Drug Code (NDC) billed at \$0.01,
- Vaccine administration CPT code and bill with usual and customary charge.

COVID-19 Vaccine CPT Code(s)		Vaccine Administration CPT Code(s)	Vaccine Name	Dosing Intervals	Emergency Use Authorization (EUA) Effective Date
91300 \$0.01	Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) (Coronavirus disease [COVID-19]) vaccine, mRNA-LNP, spike protein, preservative free, 30 mcg/0.3mL dosage, diluent reconstituted, for intramuscular use. Report 91300 with administration codes 0001A or 0002A.	0001A (1 st dose) 0002A (2 nd dose) 0003A (3 rd dose)	Pfizer BioNTech COVID-19 Vaccine	21 days	12/11/2020 3 rd dose FDA approved on 8/12/2021
91301 \$0.01	Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) (Coronavirus disease [COVID-19]) vaccine, mRNA-LNP, spike protein, preservative free, 100 mcg/0.5mL dosage, for intramuscular use. Report 91301 with administration codes 0011A, or 0012A.	0011A (1 st dose) 0012A (2 nd dose) 0013A (3 rd dose)	Moderna COVID-19 Vaccine	28 days	12/18/2020 3 rd dose EUA on 8/12/2021
91303 \$0.01	Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2)(coronavirus disease [COVID-19]) vaccine, DNA, spike protein, adenovirus type 26 vector, preservative free, 5x10 viral particles/0.5mL dosage, for intramuscular use. Report 91303 with administration code 0031A	0031A (Single Dose)	Janssen COVID-19 Vaccine	NA	2/27/2021

COVID-19 Community-Based Testing & Vaccination Billing Guide

Pharmacy Claims

When submitting a claim for the COVID-19 vaccine through Point-of-Sale (POS), submission should include the NCPDP fields and submission clarification codes as depicted below and follow recommended guidance. See [Web Announcement #2382](#).

Guidance prior to March 15, 2021:

NCPDP Field Name	NCPDP Field Number	First Dose 2020/2021	Second Dose 2020/2021	Single Dose 2021
Professional Service Code (DUR-PPS)	440-E5	MA = Medication Administration	MA = Medication Administration	MA = Medication Administration
Day Supply	405-D5	1-Day	1-Day	1-Day
Submission Clarification Code (SCC)	420-DK	2 = Other Override	6 = Starter Dose	NA
Ingredient Cost Submitted	409-D9	\$0.01	\$0.01	\$0.01
Dispensing Fee Submitted	412-DC	\$0.00	\$0.00	\$0.00
Basis of Cost Determination	423-DN	15 = Free Product	15 = Free Product	15 = Free Product
Incentive Amount Submitted	438-E3	\$17.02 / \$17.25	\$28.53 / \$25.56	\$28.56
Product / Service ID / NDC	407-D7	EUA Approved NDC	EUA Approved NDC	EUA Approved NDC
Fill Number	403-D3	00	01	00

Guidance effective March 15, 2021, and after:

COVID-19 Community-Based Testing & Vaccination Billing Guide

Nevada Medicaid Enrollment

Any provider that is vaccinating Medicaid recipients with a COVID-19 vaccine must enroll into Nevada Medicaid in order to seek vaccine administration fee reimbursement. If the provider is already enrolled in one of the allowable PTs listed above, they can submit claims for reimbursement.

If a provider wishes to enroll into Nevada Medicaid for COVID-19 vaccination purposes, an initial application is required. Please include an attachment that indicates the reason for enrollment is to administer the COVID-19 vaccine. Once the enrollment request is submitted, please email nv.providerapps@dx.com to request expedited enrollment. Include your National Provider Identifier (NPI) in the email and title the subject line COVID-19 Vaccination Enrollment. See [Web Announcement #2389](#).

COVID-19 Vaccine Distribution to Providers

All providers that would like to receive the COVID-19 vaccine to vaccinate Medicaid recipients, must enroll with the Nevada State Immunization Program. All COVID-19 vaccines will be ordered and distributed through the Nevada State Immunization Program. To enroll in the COVID-19 vaccine program, please send an email stating your interest to DPBHCOVID19VAX@health.nv.gov. COVID-19 vaccines must be stored in stand-alone refrigerators and stand-alone freezers with digital temperature monitoring. Digital data loggers must be certified calibrated and able to generate a report with daily maximum/minimum temperatures and alarm settings.

For more information on requirements of the Nevada State Immunization Program regarding the COVID-19 vaccine, go to http://dpbh.nv.gov/Programs/Immunization/COVID/COVID_Vaccine/.

Nevada WebIZ

Per NRS 439.265 and NAC 439.870 - 897, all vaccines administered in Nevada must be recorded in Nevada WebIZ, unless the patient chooses to opt-out of inclusion in the system.

Many COVID-19 vaccines require a two (2) dose series. Vaccinating providers should document patient contact information, including mobile phone number and/or email address to facilitate 2nd dose reminders.

COVID-19 vaccinations should be documented in Nevada WebIZ within 24 hours, but not later than 72 hours, of administration.

Please contact the Nevada WebIZ Help Desk at izit@health.nv.gov or (775) 684-5954 for assistance and information on how to begin using Nevada WebIZ.

Non-Covered Services

Nevada Medicaid will only reimburse for the E/M assessments, COVID-19 diagnostic tests, and COVID-19 serology antibody tests at community-based testing events. The following are not billable under COVID-19 community-based testing:

- Drive-thru ancillary costs such as staffing, supplies, travel, etc.
